WHAT STUDENTS WANT: MAPPING GLOBAL EXPECTATIONS OF BUSINESS STUDENTS

Professor Mike Wood
University of Notre Dame Australia
What students are given: “promises” & faculty expectations

Marketing the brand
Handbooks containing instructions, course outlines and policies, for example, on:

• Student learning
• Student behaviour: harassment, plagiarism
• Grading and Appeals
• Attendance
• Library use
• Student support
What students are asked on exit:

summary

By their schools – for example, satisfaction with:

• Instructors
• Subject matter
• With timely feedback
• Technology
• Facilities and management
• Library and other resources
• Career advice and opportunities
Some academic literature

• Research has been undertaken on student expectations, use of technology, gender, internships, and careers
• Several studies exist on student career expectations in relation to (1) choosing a career and company, (2) global and cultural issues, (3) gender issues, (4) differences for specific business functions, (5) recruitment, and (6) promotion, length of employment, ideal job acceptance, and the job search process.

Students and Technology

Research by JISC shows students think that technology should:

• support established methods of teaching and admin
• act as an additional resource for research and communication
• be a core part of social engagement and facilitate face-to-face friendships at university

• Although student desires have changed, the picture of an ideal classroom still shows a strong desire for lecture-dominated classes with class discussion and exercises, written handouts, and outlines. (Jackson et al 2011)
Building a Global Map...

Knowledge, skills and values
• Business skills: decision-making, accounting, finance, economics, human resource management...
• Technology
• Financial returns
• Internships
