EBS Mission Statement
Responsibility – developing your personality

Shareholder value is not the only determinant of success or failure in business. In response to today’s demand for responsible leaders with a sound personality our education concept is geared towards systematically fostering not only your professional but also your personal development throughout the entire course of your studies. Personal development in the Bachelor’s programmes comprises three areas:

Studium Universale
Our Studium Universale, which we are continually developing and expanding, is specially tailored to business and management studies. The course introduces you to the methodical principles of scientific theory and the methodological fundamentals of business and management Science.

You learn to deal with important philosophical and ethical issues. Taking a look beyond business studies sharpens your awareness of management’s particular corporate social responsibility.
Personal Mastery
In the Personal Mastery course you acquire the tools you need for your degree programme and your career, the so-called soft skills. The course addresses topics such as presentations, time management, learning strategies, academic writing, document research, team building, negotiation competence, crisis communication, etc.

Socio-cultural Impact
This area focuses specifically on individual personal development. Depending on their interests, students can engage, for instance, in social projects. Good is better – under this motto students take part in targeted project work that sharpens their critical reflection and awareness of responsible leadership qualities and sustainable management, and also assists in transferring skills already acquired into the practical environment, ultimately contributing to global social responsibility.

At EBS there are more than 20 student-led organizations and initiatives which enrich daily university life by staging activities and holding events that cover a wide range of topics. Students engage in commitments that match their interests: culture, art, sport, charity, business, politics, student management consulting, international relations, investments, E-commerce, etc.
Universität’s more than 200 corporate partners. Reputable firms provide EBS Business School with support and guidance, so that an optimal combination of theory and practice is one of our Business School’s key success factors.

Internationality – strengthening your intercultural competence
Internationality is a top priority at EBS: nearly all our courses are taught in English, numerous international guest lecturers take part in the programme, we attract a high proportion of overseas students, and our curriculum has a strong international dimension.

Coaching
Although not firmly embedded in the curriculum, EBS Coaching Programme has played a significant role in our students’ success for a number of years.

Offered on a voluntary basis, the individual coaching programme is a unique supplement to business studies courses. Selected coaches – experienced business managers specially trained in coaching – provide support and mentoring services to students in the programme.

Network – ideal platform for launching your career
We are able to draw on the know-how and wide-reaching experience of EBS
Dual Degree Programmes Bachelor

During the first three semesters all students on the General Management programme follow the same curriculum. Programme content during the last three semesters is closely coordinated with the partner university. This ensures that wherever you spend the second half of the programme you receive the same level of education, even though content and methodology may differ from country to country and university to university.

EBS students are able to choose from the following partner universities:

Programmes in English-speaking countries/English-speaking programmes

• Brock University, St. Catharine‘s, Canada
Brock University has been one of our dual degree partners in the Bachelor's programme since 2008.

• Hull Business School, UK
Hull Business School is one of our three oldest partners for the dual degree option in the Bachelor's programme.

• Corvinus University, Budapest, Hungary
Corvinus University, the leading Business University in Hungary, delivers its programme entirely in English.

• Curtin University, Perth, Australia
Beginning in 2012, EBS offers the first dual degree option with a partner university in Australia.
Programmes in Spanish-speaking countries

• Universidad Carlos III, Madrid, Spain
The Universidad Carlos III is regarded as the leading public university in Central Spain.

• Tec de Monterrey, Queretaro, Mexico und Tec de Monterrey, Guadalajara, Mexico
A new addition to the programme since 2011 is Tec de Monterrey, a multi campus university. Tec de Monterrey enjoys an excellent reputation that extends beyond the Mexican border.

Programme in China

• Tongji University, Shanghai, China
Students aiming for a career in Asia, will lay the ideal foundation by spending three semesters at Tongji. The programme is delivered in English with additional courses in Chinese, so that after 18 months students speak fluent Mandarin and are familiar with Chinese customs and traditions.

Programmes in France

• BEM, Bordeaux Ecole de Management, Bordeaux, France
BEM is the third dual degree partner since the dual degree option was introduced to EBS Bachelor’s programme.

• IESEG, Lille and Paris, France
The programme at IESEG, currently the best ranked post-bac Grand Ecole in France, is very similar in methodology and content to the programme at EBS.

• Euromed, Marseille, France
Also very similar in methodology and content to EBS is the programme at EUROMED in Marseille.
Master in Automotive Management

The automotive industry – a motor for the future
When you think of cars, Germany automatically comes to mind. For good reasons: In 2009, German car manufacturers produced more than 10 million vehicles worldwide. They generated 260 billion Euros in revenue, employed almost 723,000 people, and invested nearly 21 billion Euros in R&D. What is more, the multitude of companies along the entire automotive supply chain, including automotive suppliers, car dealers, and companies providing financial, logistics, and consulting services, also play an important role in the global economy. In the EU the automotive industry is actually the largest private investor in the field of R&D and a great motor of prosperity offering a vast spectrum of career opportunities. At the same time, the automotive industry is facing profound macro and micro economic changes, such as shifting consumer demand and environmental awareness, raw material shortages, and global competition. Change brings new opportunities and the industry is crying out for professionals with specialised skills. Against this background, it comes as a surprise that business and managerial issues relating to the automotive industry are vastly underrepresented in university curricula and research activities in Germany and throughout the world. With the EBS Master in Automotive Management we have closed this gap. Developed in the "car country" Germany and in close cooperation with the automotive industry, it is a unique, unrivalled programme that sets our graduates apart from the competition.
Master in Automotive Management

Semester 1
- Managerial Economics
- Research Methods I
- Studium Fundamentale I
- Strategy, Corporate Foresight & HRM in the Automotive Industry
